## AGROPA-VARIANT

Safety first: Tried and tested for decades our fix knob VARIANT makes steering and reversing much easier, safer and quicker than with the hand-over-hand method. And what is more: you will always have one hand free to operate any additional appliances and hydraulics. For optimum operation its turned precision axle can be adjusted to the inclination of spoke. Moreover, the AGROPA VARIANT sports a high-class plastic coating and permanently lubricated slide bearing. For a long life and satisfied customers.
